

2026 DEALER CATALOGUE

DESIGN FEATURES

Handlebars for stability

Our handlebars make it easier to balance, reduces wipeouts and shortens the learning curve for beginners considerably.

Control and safety

Ruggedised handlebars give the rider four points of input control for advanced riding, as well greatly increased safety. When the rider falls they are holding the handlebars - keeping them away from the sharp foils and propellor blades.

Designed for comfort

Ergonomically designed handle grips, scooped deck for increased responsiveness and forward facing rider position reduces rider leg fatigue over long sessions.

Stabilised board design

Board design reduces drag during touchdowns so you can recover easily and ride with ease into heavy weather conditions.

User interface

Our throttle uses a dual antenna wifi system so you can bury the board underwater and still have power after a fall or jump. And there is no complicated arming system to get going again, just pull the trigger and you are off again.

TECH SPECS

Top speed: 40kmph (60kmph for the FF series)

Ride time: up to 120mins

Battery recharge Time: 2hrs

Engine power: 5,600W or 10.000W

Range - 35km

Board construction: waterproof EPS + carbon
Hydrofoils : 100% hi modulus carbon

Total weight: 49.5 kg

Warranty: 12
Months

CRUISER MODELS

CRUISER AL

The Cruiser features our V-nose for smooth wave entry, built for confident riding in all conditions. Durable fibreglass construction & new aluminium keel makes this the ideal entry into electric hydrofoiling.

Size = 226 x 86cm
Volume= 160 litres

Color Options

- 1 - Blue & White
- 2 - All Carbon Black

Configuration Includes:

- Board with 3M deck grip
- Handlebar assembly
- Throttle unit
- Powered aluminium keel assembly complete with motor, front wing, fuselage and stabiliser wing
- 2.4kwh lithium-ion battery
- Premium high speed charger
- Accessories carry case
- Toolkit includes spare screws & shim set
- User manual (online)

Warranty - 12 months on all parts.

CRUISER CF

Designed for everyone from the beginner all the way to pro, the Cruiser features our unique V-nose entry for slicing through water and wind swells seamlessly. Plenty of buoyancy and stability for learning, and reduced side to side rock for a smooth, easy ride, but is still light enough to go fast, really fast.

Size = 226 x 86cm
Volume= 160 litres

Color Options

- 1 - Blue & White
- 2 - All Carbon Black

Configuration Includes:

- Board with deck grip
- Detachable handlebars
- Wifi speed controller
- Lithium-ion battery
- Powered keel & wing assembly
- Premium charger
- Travel case
- Three wheel padded board bag
- Accessories pouch
- Toolkit
- User manual

Warranty - 12 months on all parts.

CRUISER FF

Extreme performance combines with the original Cruiser platform. Our V-nose entry combined with a 10,000W motor delivers explosive acceleration and 65 km/h top speed. Also features Hydroflyer OS V.2, Gen 2 throttle and high spec ESC computer.

Size = 226 x 86cm

Volume= 160 litres

Color Options

Fully customisable colour-ways

Configuration Includes:

- Board with deck grip
- Handlebar assembly
- All new low-profile Gen 2 throttle
- Powered carbon fibre keel assembly complete with new high output motor, front wing, fuselage and stabiliser wing
- High output lithium-ion battery
- Premium high speed charger
- Accessories carry case
- Toolkit includes spare screws & shim set
- User manual (online)

Warranty - 12 months on all parts.

SPORT MODELS

SPORT AL

33% shorter, reducing swing weight for faster directional changes. Best for aggressive carving and a more dynamic riding feel. Durable fibreglass construction & new aluminium keel at an entry-level price.

Size = 152 x 83cm

Volume = 129 litres

Color Options

- 1 - Blue & White
- 2 - All Carbon Black

Configuration Includes:

- Fibreglass board with 3M deck grip
- Handlebar assembly
- Throttle unit
- Powered aluminium keel assembly complete with motor, front wing, fuselage and stabiliser wing
- 2.4kwh lithium-ion battery
- Premium high speed charger
- Accessories carry case
- Toolkit includes spare screws & shim set
- User manual (online)

Warranty - 12 months on all parts.

SPORT CF

Our pro model for intermediate to advanced riders. Less swing weight, faster, & more responsive. Less surface area and reduced volume allows for more speed, responsiveness and better maneuverability. Perfect for advanced riders who enjoy high speed carving and racing.

Size = 152 x 83cm
Volume = 129 litres

Color Options

- 1 - Blue & White
- 2 - All Carbon Black

Configuration Includes:

- E-foil board with deck grip
- Detachable handlebars
- Handheld controller
- Lithium-ion battery
- Mast & propulsion system
- Front wing
- Premium charger
- eFoil travel case
- eFoil board bag
- Accessories pouch
- Toolkit
- Users manual

Warranty - 12 months on all parts.

SPORT FF

Our most aggressive machine. 33% shorter than the Cruiser for rapid directional change powered by a 10,000W motor for explosive acceleration and top-end speed. Also features Hydroflyer OS V.2, Gen 2 throttle and high spec ESC computer.

Size = 152 x 83cm
Volume = 129 litres

Color Options

Fully customisable - enquire with our team

Configuration Includes:

- Board with deck grip
- Handlebar assembly
- All new low-profile throttle
- Powered carbon fibre keel assembly complete with new high output motor, front wing, fuselage and stabiliser wing
- High output lithium-ion battery
- Premium high speed charger
- Accessories carry case
- Toolkit includes spare screws & shim set
- User manual (online)

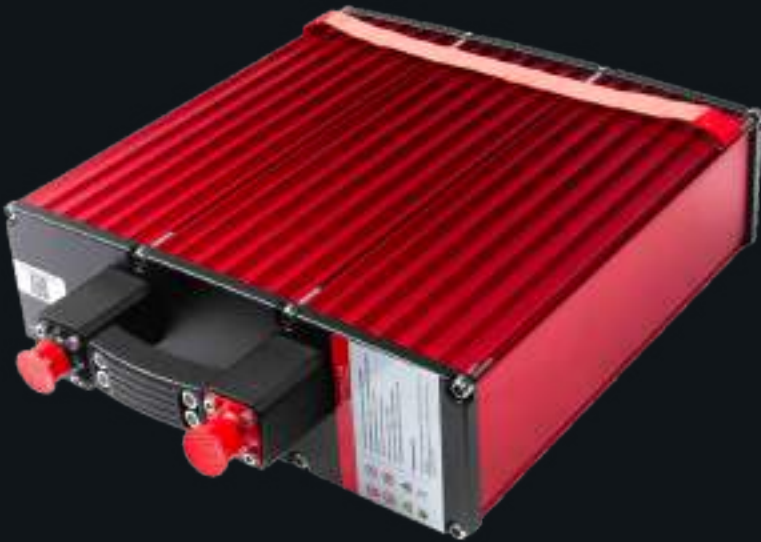

Warranty - 12 months on all parts.

ACCESSORIES

Hydroflyer Battery

Extra batteries come in handy when you're out on the water away from a power outlet. Simply purchase a spare battery and ride for twice as long.

The Hydroflyer is powered by a lithium-ion battery, one of the most advanced batteries to power a craft of this type. Built robust to handle the toughest of ocean conditions, it is the most powerful electric battery for its size available.

Features

- Weighs 15 kgs
- 2 hour charge time
- Up to 120 minute ride time, depending on conditions and riding style.
- IP67 rated - fully submersible in 1m of water up to 30 minutes.
- All aluminium case
- Bluetooth enabled smart BMS
- High discharge 200A connectors
- 42 AH - 2.49 KWh capacity - 52v Nominal - High Voltage
- 12 month warranty
- Recharges in standard AC power outlet
- 58.8v - Low-Voltage 42v

Hydroflyer Battery Charger

Premium Rapid Charge Battery Charger

Charges battery in 2 hours or less.
Plug in to any standard A/C power socket.

Plug Options

- Aus
- UK
- USA
- Europe

Hydroflyer Wireless Throttle

Gen. 1

Ergonomically designed with 3 different speed levels, and full LCD display, this is a controller you can count on when it matters. Featuring GPS and wireless wifi connectivity, signalling an advanced onboard computer system.

Features

- 100% waterproof and rechargeable
- Floats on the surface so it never gets lost
- 3 speed levels
- Reverse mode, a world first for a craft of this type
- Motor shuts off when trigger is released
- Leash with kill-switch magnet for added safety
- Colour screen displays battery life, speed, and moisture sensor alarm.
- Ergonomically designed to reduce hand cramps
- Powerful wireless wifi technology

Hydroflyer Wireless Throttle

Gen. 2

Ergonomically designed featuring GPS and wireless wifi connectivity, signalling an advanced onboard computer system.

With 10 speed levels, and full LCD display, this is a throttle you can control when it matters.

Features

- 100% waterproof and rechargeable
- LED lights indicate battery level
- 10 Speed levels & take off sequences
- Customisable throttle mapping.
- Push button reverse mode
- Motor shuts off when trigger is released
- Safety leash with auto cutoff
- Syncs with next gen Android user interface on separate colour screen for battery life, speed, and moisture sensor.
- Cut from a solid block of aircraft grade 6061-T6 aluminium

CF Powered Keel

Our unique water cooled direct drive system was designed with both safety and hi-performance in mind. We have created a unique cooling system to ensure our battery and motor operates at maximum efficiency for extended battery life. Our user interface monitors the motor and battery and sends feedback to the rider.

Features

- Small and hydrodynamic motor casing designed for maximum glide and reduced drag
- Almost silent. Reduced moving parts means minimal noise
- Water cooled direct drive, built to run all day
- Alloy propeller blades with protection ring for enhanced safety, stability and lowered vibration
- Low maintenance and built to last in tough conditions

Includes :

- Carbon fiber keel, motor, propellor & guard

Hydroflyer Carry Case

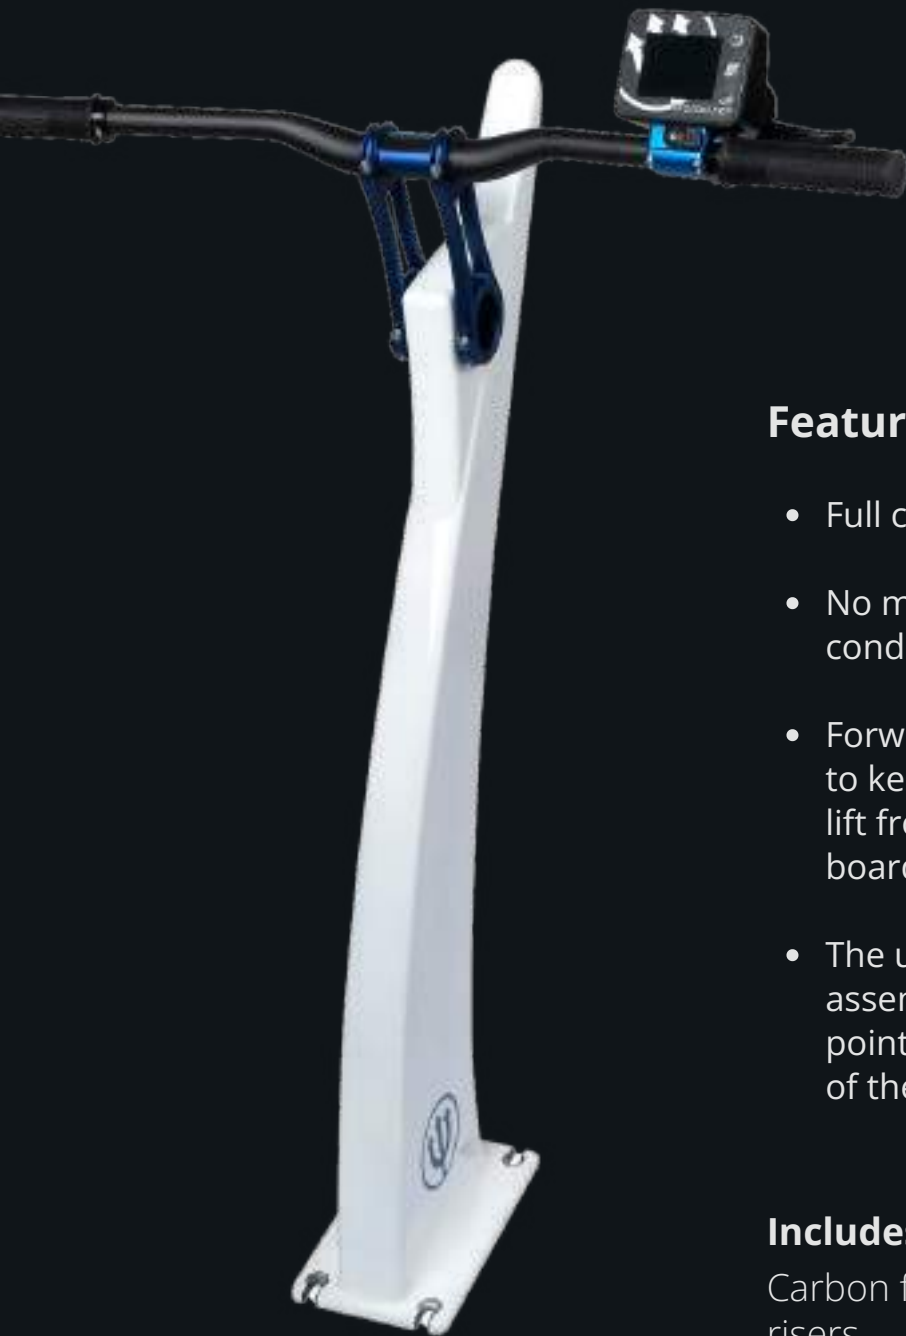

Features heavy duty material with a deluxe feel. Foam inserts protect your investment.

Includes :

Heavy duty bag and foam insert.

Hydroflyer Handlebar Assembly

Our innovative full carbon ruggedised handlebars were designed with both safety and high-performance in mind. They are over engineered so will take a beating and look stunning at the same time.

Features

- Full carbon construction
- No maintenance, and built to last in tough conditions including jumps and surf riding
- Forward leaning handlebars allow the rider to keep weight forward on the board as the lift from the main foil brings the nose of the board up
- The unique design of the handlebar assembly also means that the connection point to the board is closer to the pivot point of the rider, allowing more efficient turning

Includes :

Carbon fiber mast, handlebars, & aluminium risers.

Hydroflyer Board Bag

Our three wheel padded board bag was designed to protect your investment. It is constructed of the finest premium materials and heavy duty corrosion resistant zips.

Features

- A stiff supported rear section houses three x 8cm wheels which will get you over the roughest ground
- Corrosion resistant plastic zips
- Padded premium PVC materials throughout
- Padded rail protector, can be removed for daily use
- Handles on three sides make for easy loading on the roof of your car

Hydroflyer Fender

The Flyer Fender

This inflatable bumper attaches to the Hydroflyer Cruiser in minutes and provides a huge amount of extra stability and flotation for new or heavier riders.

Recommended as a great learning tool for anyone over 220lb's or 100kg's

- Comes with pump &
- Repair kit
- 40 litres volume

Various Accessories

Tool Bag

Our three wheel padded board bag was designed to protect your investment. It is constructed of the finest premium materials and heavy duty corrosion resistant zips.

Handlebar Grips

Soft grips to prolong your riding sessions

Tail Assembly

Fuselage, shims & rear stabiliser wing
